NY GENERATION LED LYS

- Markedet for LED lys har gennem de seneste 5 år været jævnt stigende
 - Da de første LED lys kom på markedet så de meget kunstige ud
 - LED lys estimeres til i dag at udgøre en markedsværdi på ca. 100 Mio Kr i Danmark
 - LED lys har haft en stabil omsætning de seneste 2-3 år og nu er der en ny generation på vej, som vi forventer kan skabe ny vækst i markedet
 - LED lys og levende lys har efterhånden fået deres indtog i mange hjem
 - Tidligere var det typisk sådan, at enten brugte man levende lys eller LED lys, men nu er tendensen at man benytter både og i mange danske hjem
 - Vi har talt med forbrugerne og spurgt indtil deres vaner om lys
 - **Levende lys benyttes typisk i de rum, hvor man befinder, når man skal hygge sig eller når man har gæster, mens LED lys ofte er en lyskilde der anbringes i rum, hvor man ikke er hele tiden, men blot passerer forbi så der er lys, når man kommer i rummet**
 - **Flere ældre mennesker siger, at de ikke tør tænde levende lys og derfor er LED lys et godt alternativ**
 - **Institutioner har gjort levende lys forbudt, så der er alternativet LED lys eller ingenting**
- Endvidere kan LED lys leveres med timer, som gør at de slukker af sig selv og man kan tilmed købe en remote control og tænde og slukke flere på lys én gang. Dette synes mange er praktisk, hvis de har dem stående i lanterner og beholdere, så man ikke skal rundt og tænde og slukke – så her er det bekvæmligt.
- **Ny patenteret væge**
 - **Det lyser, som en autentisk brændende flamme**
 - **Det er lavet i en paraffin skal og det ligner ikke et plastic/kunstigt lys**
 - **Er patenteret**
 - **Ser naturtro og autentisk ud ved siden af et ægte levende lys**
 - **Denne væge indeholder 13 dioder og derfor står den ikke og blinker som andre lignende produkter, men lyser op med en naturtro flamme**
 - **Kernen er beklædt med paraffin og ligner overfladen på et rigtigt lys. Ved at overfladen er beklædt med paraffin gulner overfladen ikke så hurtigt og bliver grim, som en tilsvarende kerne af plastic. Kernen ligner et rigtigt lys og ikke et plastic lys!**
 - **Indeni kernen ligger al elektronik og der benyttes AA og AAA batterier til produkterne**
 - **Produkterne leveres uden batteri**

indvendige kanaler
Inner Duct

KANAL KRONELYS - LYS MED EKSTRA SIKKERHED

1. Flydende stearin løber ned i kanalerne, så lyset ikke løber.
2. Brænder med stor og smuk flamme.
3. Brænder med „tør skål“.
4. Skarp og „løbesikker“ kant.
5. 100% stearin giver sodfri flamme.
6. Specialimprægneret væge.

CANAL CROWNTOP CANDLES - CANDLE WITH EXTRA PRECAUTION

1. Liquid stearin runs down into the canals.
2. Burns with a big and beautiful flame.
3. Burns with „dry bowl“.
4. Sharp „run-safe“ edge.
5. 100% stearin makes a soot-free flame.
6. Special wick proof.
